REISSUE APPLICATION DECLARATION BY THE ASSIGNEE

Application Number: 09/595,557

Docket Number: P11511C2R

Error Statement, continued from page 2.

The possibility of this error was first discovered after payment of the issue fee, but the attorney did not fully appreciate the proper scope of the invention until after conducting an investigation which was not completed until after the patent issued."

The expression in the original claim 1 that recited "one or more user stations" and further recited, "each user station in said first cell is assigned a second transmission frequency for transmitting to said base station for the respective first cell, said second transmission frequency not being assigned to any user station in any cell in said pattern of cells adjacent to said first cell.", renders the original patent wholly or partly inoperative or invalid. Applicant in the present patent application in independent claim 4 has removed the reference to "one or more user stations" and does not include the limitation that "user stations within adjacent cells have to also be assigned different frequencies for communication".
